IV. ACKNOWLEDGEMENT OF ENVIRONMENTAL CONTROL REQUIREMENTS BY R.O.				
I, _____, the Responsible Official for _____, have:				
(R.O. Name) (Company Name)				
(1) read and understand the provisions of Nevada Administrative Code (NAC) Section 445B.22037 "Emissions of Particulate Matter: Fugitive Dust" which requires that we prevent controllable fugitive dust to become airborne on a 7-day/24-hour /day basis at our Project's site; and , (2) read and understand the terms and conditions of our Project's Nevada Division of Environmental Quality Bureau of Air Pollution Control Permit AP _____.

V. PROJECT OPERATIONS

Description of Project Operations: _____

VI. FUGITIVE DUST CONTROL - BEST PRACTICAL METHODS

Best Practical Methods for controlling fugitive dust (Project Site): The best practical methods (BPMs) to be used for controlling fugitive dust generated at this Project's disturbed areas are as follows. This is not an all inclusive list, other BPMs may also be appropriate for this section (check appropriate BPMs):

- ☐ Use of water trucks to spray water on disturbed areas on a regular basis
- ☐ Pre-watering of areas to be disturbed (including all unpaved onsite roads and staging areas)
- ☐ Graveling of roadways, storage areas and staging areas
- ☐ Posting and limiting vehicle speeds to 10-15 miles per hour
- ☐ Use of wind fences to reduce wind impacts
- ☐ Cessation of all operations when winds make fugitive dust control difficult
- ☐ Fencing or berming to prevent unauthorized access to disturbed areas.
- ☐ Application of water sprays on material storage piles on a regular basis
- ☐ Covering material storage piles with tarpaulin or geo-textiles; tenting
- ☐ Use of overhead water spray rack or water hoses to water down uncovered trucks transporting processed materials prior to leaving Project boundaries.
- ☐ Subcontractors: Any and all subcontractors (including truck drivers) informed of their responsibilities for the control of fugitive dust while they are on the project site (including haul roads to and from the site). In addition, they will be advised of the best practical methods for controlling their fugitive dust as well as keeping off adjacent areas not covered by the project's permit.
- ☐ Training of construction equipment operators to recognize fugitive dust generation and having the

VII. PROJECT FUGITIVE DUST/EMISSIONS RESOURCES INFORMATION			
Water Trucks: Water trucks may be owned or rented. In the event that one or more water truck(s) necessary for control of fugitive dust (owned, rented or leased) becomes inoperable, additional water truck(s) will be rented or leased for until such time the water truck(s) are operable. Operable water truck (s) must be available on 7-day/week, 24-hour/day basis.			
Number of Water Trucks:			
Water Truck # 1		Capacity Gallons:	
Water Truck # 2		Capacity Gallons:	
Water Truck # 3		Capacity Gallons:	
Location of water supply for control of fugitive dust:			
Water Truck and Construction Equipment Operational Log: the daily operations log book for recording the operation of the water truck and construction equipment is maintained on the Project site. The log contains the following information:			
<ul style="list-style-type: none">• Hours of operation for each water truck and construction equipment (front loader, scraper, etc.) used onsite.• The daily quantity of water used for fugitive dust control purposes.• Starting and ending times for the workday.• Record of water truck (including rental water truck) and construction equipment maintenance, malfunctions and repairs			

VIII. NOTIFICATION
Excess Emissions: Training Requirements: The following training requirements are <u>recommended</u> as an aid maintaining compliance with permit terms and conditions and are not mandatory. It is recommended that the R.O. and/or selected equipment operators be given USEPA Method 9 visual emission training (or equivalent, as determined by NDEP) to recognize when the facility's permit's opacity limits are being exceeded and procedures to follow to bring systems back into compliance. It is recommended that all training records be kept with the facility's Process and Emission Control Equipment Operational Log.

IX. TRAINING
Training Requirements: The following training requirements are <u>recommended</u> as an aid in maintaining

compliance with permit terms and conditions and are not mandatory. It is recommended that the R.O. and/or selected equipment operators be given USEPA Method 9 visual emission training (or equivalent, as determined by NDEP) to recognize when the facility's permit's opacity limits are being exceeded and procedures to follow to bring systems back into compliance. It is recommended that all training records be kept with the facility's Process and Emission Control Equipment Operational Log.

X. PLAN REVISION

Plan Revision Requirements: In the event there are changes in the operation of the Project, modifications made to the Project's Air Quality Operating Permit or changes to the Nevada Administrative Code affecting this plan, the plan shall be revised to reflect those changes and modifications and resubmitted to the Nevada Division of Environmental Protection for review and evaluation.

Plan Date:
